# Abu-Ghazaleh Information Technology International Announces the Launch of its Online Examination System

AMMAN - Talal Abu-Ghazaleh Information Technology International (TAG-ITI), announced the launch of the electronic examination system. The system has been fully developed by TAG-ITI's E-Solutions team, to replace the paper examination system by online web-based examination system.

In this regard, Mr. Reyad Al-Noubeh TAG-ITI's E-Solutions Executive Director pointed out that the e-system has been designed to be user friendly with time, effort and cost saving benefits in an era where digital transformation has become a necessity for all sectors, especially education.

TAG-ITI has begun implementing the system - as a start – on all the professional certificates offered by The International Arab Society of Certified Accountants (IASCA)

Moreover, Mr. Al-Noubeh stated that the automation of the system took place after IASCA's success in the automation of professional curricula and training courses in order to become digital and interactive.

## About TAG-ITI
TAG-ITI is one of the leading firms in web solutions in the Middle East, with fifteen years' experience and extensive capability in building and designing websites and interactive pages.

## About IASCA
The International Arab Society of Certified Accountants (IASCA) was established in 1984 as a non-profit professional accounting association in London, UK. It was formally registered in Amman on February 24, 1994, aiming at advancing the profession of accounting, auditing and other related disciplines in the countries of the League of Arab States. IASCA also aims at maintaining the professional independence and protection of Arab accountants, as well as the application of professional supervisory measures.

## Our Services: Digital Forensics Services

Talal Abu-Ghazaleh Information Technology International (TAG-ITI) offers a full range of digital forensics services ranging from identification of hacking systems to data capture, full data recovery services for logical and physical accidents, identification of directories that have been deleted, destroyed or stored on external hard disk.

TAG-ITI security experts have conducted many similar projects in the Arab region, including government, semi-governmental and private companies in various business sectors.

Digital Forensics is the "application of computer science and investigative procedures involving digital evidence analysis." Digital Forensics, in a simpler language, is the use of specialized tools and techniques to investigate various forms of IT crimes, including fraud, data leakage, customer data protection and many forms of intrusions. This service has expanded to include digital forensics for networks as well, such as investigating network security violations, hacking attempts and data theft.

Digital forensics is about detecting hackers from inside or outside, analyzing what they have done to an enterprise's computer system, tracking and identifying an intruder and creating a set of clues about hacker activities.

This service contributes very effectively to the security of computers and systems against all types of unauthorized access.

# The Joint Board for Military Development and Innovation Holds its 7th Meeting

AMMAN - The Joint Board for Military Development and Innovation held its 7th meeting at Talal Abu-Ghazaleh Global (TAG.Global)/ General Administration Building in the presence of members of the Board of Directors.

The attendees were briefed on its achievements, and the Board continued its establishment of the Executive Committees including 'Creativity', 'Methodology', 'Solutions' and 'Turning Inventions into Products' committees to work in parallel to collectively achieve the objectives and create a suitable environment for creativity in different fields.

During the meeting, the Board stressed the importance of exploring all potentials in the field of ICT-based military creativity, development and innovation.

Furthermore, the Board endorsed the initial outlines for a conference to be held on the "Role of Information Technology in Supporting Military Industries and Strengthening Partnership between Private Sector and Military Institutions".

The participants also discussed the Board's Incubator Project which will be established at Talal Abu-Ghazaleh University College for Innovation (TAGUCI) in collaboration between TAG. Global, Zain Jordan and King Abdullah II Design and Development Bureau (KADDB), noting that work priorities and needs of the Armed Forces in this field have been identified, in addition to the activities which the Incubator will focus on.

Additionally, the Board members discussed the means for enhancing cooperation in training programs and capacity building through specialized training in e-archiving, systems development, patent drafting and holding workshops for concerned stakeholders, communication engineers and information technology experts.

They also tackled other issues regarding the finalization of linking the Armed Forces, KADDB, and the General Directorate of Civil Defense to the Arab States Research and Education Network (ASREN), as well as, the activation of TAG.Global's knowledge stations which were established at the Armed Forces and security apparatus' units, and the establishment of a new knowledge station at the Royal Medical Services - Princess Aisha Bint Al Hussein College for Nursing and Health Sciences in Marka.

At the end of the meeting, Dr. Abu-Ghazaleh expressed his pride and appreciation to the Armed Forces-Arab Army and all security apparatus, underlining the significant role exerted by these institutions in protecting and providing the required environment for people's life, work and stability affirming that they are equal to their global counterparts in terms of efficiency, capacities and knowledge. He also expressed hope that more progress will be achieved under the leadership of His Majesty King Abdullah II bin Al Hussein.

It's worth mentioning that the Joint Board for Military Development and Innovation is the outcome of the cooperation agreement signed between the Jordanian Armed Forces - the Arab Army and Talal Abu-Ghazaleh Global in 2017 which resulted in the establishment of a number of knowledge stations that constitute the main driver for creativity and excellence through specialized training for the support of smart transformation projects and creation of the necessary infrastructure for creativity.
