A Glance at one of our services - Financial Modeling

TAG-Value constructs various financial models, each of which is based on a different scenario for the purpose of testing and weighing all the available options in a given situation. These models undergo a sensitivity analysis in order to clearly reflect the impact of prevailing economic and financial conditions on the end results.

Financial models illustrate the analysis of a company's projected financial data, in addition to assessing the effects of all variables on the model. Results are then interpreted in reports that support your business decisions.

Financial modeling includes:

- Basic financial model
 - Premium financial model
 - Startup financial model
 - Acquisition model
 - Valuation model
 - Real estate model
