Talal Abu-Ghazaleh E-Training Yemen Office Concludes Three Training Courses in Advanced Excel for Several Entities

SANA'A - Talal Abu-Ghazaleh E-Training in Yemen concluded three Advanced Excel training courses which it organized during February for various entities.

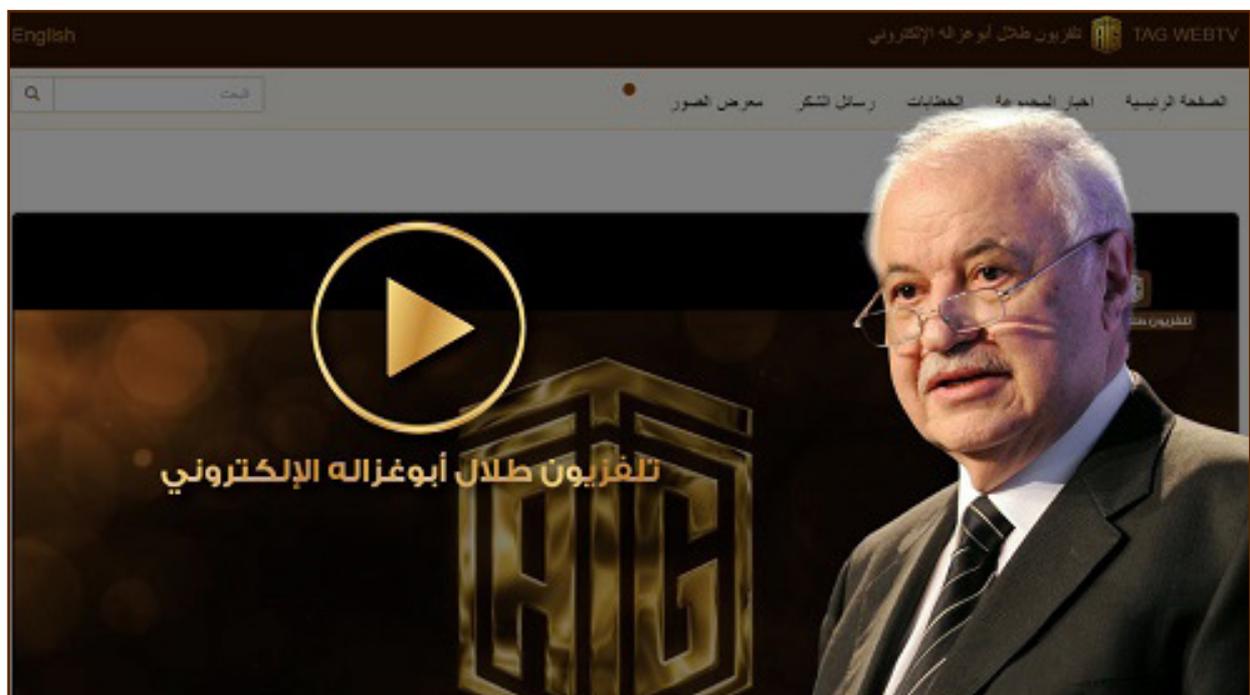

The first training course was intended for a group of Lebanese International University's graduates and staff, as the same training course was organized for the same category in the university last January. Number of participants of graduates and staff in both training courses was 51 participants. Moreover, Talal Abu-Ghazaleh E-Training conducted the second training course for Al-Saeed Trading Company, while the third

training course was held at Talal Abu-Ghazaleh E-Training Center with 37 participants from various institutions.

The participants in all three courses expressed their satisfaction with the information that the trainers provided them with, especially that such information cover their various training needs. Participants stressed their ongoing keenness on benefiting from the training services provided by Talal Abu-Ghazaleh E-Training Center.

Mr. Majed Al-Shagathah, the Executive Director of Talal Abu-Ghazaleh E-Training Yemen office, stated that the office focuses on holding the Advanced Excel course continuously due to the urgent need for this course and the wide demand at the organization's office. Mr. Al-Shagathah pointed out that the office is constantly working on addressing the needs of institutions and individuals with regard to training courses, as the office is keen on giving consideration to these needs and providing courses accordingly.

Talal Abu-Ghazaleh Organization Launches a New Web TV Service Tailored for the Knowledge Era

AMMAN - With the aim of expanding its presence on the World Wide Web, the Talal Abu-Ghazaleh Organization (TAG-Org) has launched its unique Web TV channel featuring a wide variety of content, high quality streaming, and a user-friendly

interface design customized to reach a global audience.

Talal Abu-Ghazaleh WebTV (TAG WebTV) is another addition to the online media arsenal of TAG-Org which includes social media networks,

global news agency and Talal Abu-Ghazaleh Business and Culture Radio (TAGBC 102.7 FM) in addition to others. On the occasion of the launch, HE Dr. Talal Abu-Ghazaleh said: “We are proud of the new addition to our online presence which will be a platform to market our services and news. The WebTV has been designed to provide full news coverage of all our activities around the world and with plans for more tools. The WebTV launch comes as part of our expansion strategy globally.”

He added: “Our work has been instrumental in our strategy since 1972 and today we see the rapid development in technology in almost

every sector and field and that is why we intended to have the best media tools to present our services and market our new ones.”

TAG WebTV will benefit from the strong presence of TAG-Org which has more than 100 offices around the world that provide a host of services including Intellectual Property, Translation, Legal, Consulting and education in addition to others.

The WebTV (www.tagbc-tv.com) will focus on business and cultural news, live coverage of events and classical music with a comprehensive library of videos uploaded for the audience to watch anytime 24/7.

President of the Republic of Macedonia Hosts Dr. Abu-Ghazaleh As a Guest of Honor

STRUGA, Macedonia - President of the Republic of Macedonia, HE Gjorge Ivanov hosted HE Dr. Talal Abu-Ghazaleh, founder and chairman of Talal

Abu-Ghazaleh Organization (TAG-Org) as a guest of honor at the opening of the new session of International Young Leader Training to shed light on the future and development of the education sector.

HE President Ivanov, welcomed Dr. Abu-Ghazaleh and thanked him for his participation as guest of honor. During the session,

HE Mr. Ivanov addressed many important issues including the future of education, his vision of the Fourth Industrial Revolution as well as other important topics related to Blockchain, Artificial Intelligence, Big Data, and Robots affirming their advancement in his country and urging students and young leaders to employ these technologies and use them as basic pillars in the educational development process.

For his part, Dr. Abu-Ghazaleh extended his gratitude to HE the President, emphasizing the importance of all the guidelines and instructions mentioned in his address and highlighting certain topics relating to the Fourth Industrial Revolution, his optimistic vision and initiatives that aim at providing a better future through education.

Dr. Abu-Ghazaleh started his speech by presenting his own vision regarding the future of the education sector and the most important pillars that need to be taken into consideration notably the fact that ‘we need to graduate innovators not job seekers.’

He further noted that the current world education system needs radical development to adapt to a world of rapid change describing the education system as medication that could never be a cure for all diseases.

Furthermore, Dr. Abu-Ghazaleh stated that all aspects of daily life and industries have undergone rapid development over the years, affirming that the current ‘backward’ education system is in need of urgent development.

He affirmed that this is the reason for his establishment of the Talal Abu-Ghazaleh University College for Innovation in which classrooms are business incubators and teachers are mentors, supporters and instructors. “The College aims at graduating inventors and holders of knowledge-based innovations.”

Moreover, Dr. Abu-Ghazaleh mentioned his newly published book entitled “The Brave Knowledge World” which introduces his lifelong vision and philosophy relating to the Knowledge Revolution and its impact on the future of humanity.

Meanwhile Dr. Abu-Ghazaleh pointed out that there are many concerns regarding the rise of Artificial Intelligence (AI) in our world.

“The labor market, various industries and even educational systems around the world are watching the development in the AI field closely and they are a bit terrified. Could machines using Artificial Intelligence make doctors obsolete? It is not a question of maybe, but when!”

It’s noteworthy to mention that Dr. Abu-Ghazaleh received from HE President Ivanov a Certificate of Appreciation in acknowledgement of his tremendous efforts in the world of knowledge while Dr. Abu-Ghazaleh presented the President with the Talal Abu-Ghazaleh Organization Honorary Shield in recognition of his national and international efforts and contributions.

At the end of the visit, President Ivanov held a state dinner in honor of Dr. Abu-Ghazaleh.

On the sideline of his visit, Dr. Abu-Ghazaleh was interviewed by various local media outlets, participated in a panel discussion on the Fourth Industrial Revolution, and signed the VIP Visitor Book at the President’s Office.
