ISTANBUL -The International Arab Society of Certified Accountants (IASCA), chaired by HE Dr. Talal Abu-Ghazaleh, held a specialized training course entitled 'Fundamentals of Financial Accounting according to IFRS' for a group of participants from the Libya Africa Investment Portfolio (LAIP) in Turkey, Istanbul.

The course aimed at enhancing the capability of the participants from LAIP by introducing them to the latest updates about the International Accounting Standards (IAS) and the International Financial Reporting Standards (IFRS), as well as enabling them of analyzing financial information and assessing inventory with high efficiency. That is in addition to enabling the participants of detecting, analyzing, and correcting potential errors to fulfill the needs of the LAIP.

The course addressed the importance of IAS in boosting the efficiency and openness of many financial markets around the world. The process of making informed economic decisions about

investments and risks as well as the optimum use and allocation of capital were also addressed in the course.

International standards play a significant role in reducing the costs of reporting and enhancing compliance with regulatory requirements, which is especially beneficial for firms that have subsidiaries and activities in many countries.

At the end of the course, all participants were given certificates of attendance, stating that the training course met their practical needs and requirements.

It is worth noting that the Libya Africa Investment Portfolio (LAIP) is one of the investment portfolios owned by the Libyan Investment Authority. LAIP was established in 2006 to develop and produce wealth on the long-run focusing on sustainability, working according to acceptable international standards to ensure transparency and compliance with all laws and regulations to preserve the wealth of the Libyan nation.

- Contains an example case study to illustrate the transition from the International Standard on Quality Control 1, Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements; and

- Includes multiple documentation aids covering independence, acceptance, and continuance of clients and engagements, resources, and outside consultation, as well as a sample checklist for engagement quality reviews.

[Installment One](#) of the series addressed the mindset change the new standards require and the shift in focus from quality control to quality management. Proposed International Standard on Sustainability Assurance 5000 Approved for Public Consultation by Unanimous Vote /ISSA 5000

ISSA 5000, General Requirements for Sustainability Assurance Engagements, will be open for public consultation by August

NEW YORK - The IAASB announced that it has approved by unanimous vote the draft International Standard on Sustainability Assurance (ISSA) 5000, General Requirements for Sustainability Assurance Engagements, for public consultation. The consultation will be open by early August until early December 2023.

With the increasing global demand for corporate reporting and disclosure on sustainability, ESG (environmental, sustainability, and governance), and climate-related information. This proposed standard aims to enhance confidence in sustainability reporting, responds to IOSCO recommendations, and complements the work of other standard setters, including the International Ethics Standards Board for Accountants, EFRAG, International Sustainability Standards Board, and IFRS Foundation, Global Reporting Initiative, and others.

Once finalized, ISSA 5000 will serve as a comprehensive, stand-alone standard suitable for limited and reasonable sustainability assurance engagements. It will apply to sustainability information reported across any sustainability topic and prepared under multiple frameworks. Moreover, the standard will be profession-agnostic, enabling its use by professional accountants and other

professionals performing sustainability assurance engagements.

As the IAASB works toward the release of the draft standard, it is also in the process of finalizing extensive outreach plans. These plans include a series of four roundtable discussions, as well as virtual, regional, and national events held in partnership with other organizations throughout the consultation period. To stay updated on the latest information and upcoming events, please follow us on [Twitter](#) and [LinkedIn](#) and consider [registering or subscribing to our mailing list via the IAASB website.](#)
