'Abu-Ghazaleh for Technology' Announces the Arrival of TAG-PHONE, the First Arab Smartphone

In the field of programing and information technology fields 'Abu-Ghazaleh Knowledge Center' and Jordan Code IT Solutions Sign Cooperation Agreement

AMMAN – Talal Abu-Ghazaleh Knowledge Center, a member of Talal Abu-Ghazaleh Global (TAG.Global), and Jordan Code IT Solutions Company signed a cooperation agreement to organize training courses in Programing and Information Technology fields.

Signed at TAG.Global premises by Jordan Code IT Solutions General Manager, Mr. Salah Bassiouni, and TAG-Knowledge Center Executive Director, Mr. Zaid Al Majali, the agreement aims to cooperate in holding training courses offered by Jordan Code IT Solutions in the fields of Programing, Information Technology and Communication, E-Learning and Digital Transformation to add a true value to clients' businesses by providing them with the latest and most reliable ICT solutions globally.

On the occasion, Mr. Bassiouni expressed his pride in partnering with TAG.Global, and thanked HE Dr. Talal Abu-Ghazaleh, for his ongoing contributions in serving the local community and civil institutions that endeavor to build youth's capacities and sharpen their skills throughout the Kingdom.

For his part, Al Majali underlined the importance of the cooperation agreement that will serve a large segment of the local community by improving their professional capacity in ICT and digital transformation fields; helping them to compete in the labor market; and keeping them updated with the latest ICT developments.

Talal Abu-Ghazaleh Knowledge Center is one of TAG.Global initiatives that targets the Arab youth and strives to assist in developing human resources and qualifying professionals, in addition to providing them with advanced technological tools in the field of ICT to enrich and qualify them with a wide-range of expertise offered by TAG.Global's professionals and experts to meet labor market challenges with the best qualifications.

During his weekly program 'The World to Where?' on RT Abu-Ghazaleh: Two Threats Face Humankind; an Out of Control AI and Machine Supremacy over Human Mind

AMMAN – Well-known Arab economist, Dr. Talal Abu-Ghazaleh, founder and chairman of Talal Abu-Ghazaleh Global (TAG.Global), shed light on the existential Artificial Intelligence (AI) risks that might threaten mankind, saying that either Machines would go out of control of their creators, or they surpass human mind.

In a new episode of the "World to Where?" weekly program on Russia Today (RT) Dr. Abu-Ghazaleh stated that: 'The world has entered the Fourth Industrial Revolution which impacted all aspects of our life including us the human beings. He added that the Revolution will change our lives and will also make us live longer, although on the other hand it has an ugly facet.

"Today, the world is embracing an inclusive digital transformation, yet, we would be facing a real challenge; machine intelligence that we create will surpass human intelligence one day, where the machine would become more ambitious to rule the world," Dr. Abu-Ghazaleh said.

Dr. Abu Ghazaleh referred to statements made by two business magnates, the American businessman and entrepreneur Elon Musk, the founder of SpaceX and the CEO of the electric car Tesla; and the Chinese businessman Jack Ma, the co-founder of Alibaba Group; the multinational technology company specialized in e-commerce, as they both pointed out that 'Machines could overtake and surpass humans in many ways.

Therefore, Dr. Abu-Ghazaleh called for establishing a control and monitoring department to reduce Artificial Intelligence risks, urging similar monitoring of social media platforms, saying: "Digital Revolution has no restraints at all, which is so scary and no one has even proposed to establish an international governing body to control this Revolution."

Meanwhile, Dr. Abu-Ghazaleh underlined two key concerns: Machines would be out of control of their own makers and the World in light of the Industrial Revolution would be divided into two categories; the high-tech category and the technologically retarded category, which failed to utilize technology benefits.

During the program, Dr. Abu-Ghazaleh referred to his newly released book entitled "The Inevitable Digital Future: A World of Smart Cities" which he prepared in light of the role of technology in the field of sustainable urbanization, noting that the book will be available for free distribution shortly.

In the book, Dr. Abu-Ghazaleh talks about different types of technology which he believes is the cornerstone for the establishment of Smart Cities, and the lessons learnt from failed smart city initiatives; in addition to a blueprint that can be used to develop comprehensive smart cities of the future.

'Abu-Ghazaleh for Technology' Announces the Arrival of TAG-PHONE, the First Arab Smartphone

AMMAN – Talal Abu-Ghazaleh for Technology (TAGTech), a member of Talal Abu-Ghazaleh Global (TAG.Global), announced the arrival of the first series of the smartphone (TAG-Phone), designed and produced with high specifications and technologies; offered at affordable and competitive prices.

TAG-Phone is the first smartphone produced and manufactured in TAG.Global factories in China with an Arab investment.

TAGTech Digital Marketing Executive Director, Mr. Ramez Quneibi, stated that the new TAG-Phone crystallizes the strategic plan of HE Dr. Talal Abu-Ghazaleh, founder and chairman of TAG.Global, in producing, designing and manufacturing Arab electronic devices that compete with the highest international specifications.

The new TAG-Phone comes with 6.217inch HD screen, 6 GB RAM, 64 GB Storage, an 8 MP Front Camera, a 16 MP Rear Camera,

an Auxiliary Camera 0.3 MP with Flash LED. TAG-Phone also comes with Dual Nano SIM card, in addition to Android 10.0 OS with Google Certification (GMS Approval) and fast Charging Port.

TAG-Phone device is available in Jordan at JD 100 inclusive tax at TAG.Global showrooms or online order through TAGTech website, noting that it has a one-year warranty, and is available for free delivery to all governorates in the Kingdom.

Furthermore, Quneibi pointed out that the launch of TAG-Phone coincides with the celebrations of Christmas and the New Year, which will be a great opportunity for everyone to gift the new device. He further noted that the TAG-Phone works with Android operating system.

Additionally, Quneibi pointed out that the second series of the phone (TAG-Phone Plus) will be available for sale in mid – January 2021, at JD125, while the third series (TAG-Phone Advanced), which is currently being manufactured, will arrive to Jordan mid-February 2021, and will be available for purchase by all at all local and international showrooms and retailers at JD150.
