In the field of Training and Building Capacities 'Abu-Ghazaleh Academy' and Jordan Engineers Association Sign Cooperation Agreement

‘Abu-Ghazaleh Global’ Registers 41 Innovative Solutions as Copyright at the Department of National Library

AMMAN – Talal Abu-Ghazaleh Global (TAG.Global) announced the registration of 41-systems and solutions as copyright at the Department of National Library in Jordan, developed by its TAG ICT Innovations team.

The developed systems are fully operational at all TAG.Global’s offices around the world, providing various solutions in different sectors including accounting, auditing, business management, Intellectual Property, trademarks, patents, administrative systems and others, with the aim of facilitating TAG.Global’s, as well as of other corporate and clients businesses, in both the private and the public sectors.

Mr. Reyad Al-Noubah, TAG ICT Innovations Department Executive Director, stated that the newly developed systems are characterized by their flexibility, easy usage, customization and the potential of modification and development. That is in addition to their high security. The systems are available in both Arabic and English languages.

Al-Noubah pointed out that these programs have been serving a large segment of public institutions including the Jordanian Senate; Civil Status and Passports Department; Ministry of Industry, Trade & Supply; Petra Development & Tourism Region Authority; a number of banks in Jordan; and other institutions.

Al-Noubah also indicated that TAG ICT Innovations Department is operated by a large number of specialized experts in creating and developing e-programs using

various programming tools and languages such as Oracle, JAVA, .net, PHP, Angular, Node JS, JAVA Script, AJAX, Joomla, Drupal, Moodle and different computer software. He added that the technical experts and support staff at TAG.Global put their vast expertise at the service of institutions and organizations to meet their technical requirements, to ensure the introduction of new software or to excellently upgrade them.

Al-Noubah concluded by emphasizing that TAG.Global’s achievements that distinguish it from the world’s companies are attributed to the implementation of its Chairman’s directives which untiringly call for embracing creativity and innovation. Dr. Abu Ghazaleh believes that fighting digital illiteracy is an imperative human need, noting that he has been calling for fighting digital illiteracy since he was chair of the UN Global Alliance for ICT for Development.

‘Abu-Ghazaleh Knowledge Society and Steam Center Organize AI Workshop

AMMAN - Talal Abu-Ghazaleh Knowledge Society (TAG-KS), a member of Talal Abu-Ghazaleh Global (TAG.Global), in cooperation with Steam Center, organized a training workshop on Artificial Intelligence (AI).

The workshop was held in accordance with the previously signed agreement between the two parties aiming at holding training courses in the fields of AI, Robotics, Internet of Things (IoT), Programming and Life Skills, at TAG-KS’ affiliated knowledge stations throughout the Kingdom.

The 5-hour workshop introduced the 18 participants to the concepts of IoT, AI, Arduino Software and how to download it, designing interactive electronic projects, robotics programming among other related subjects.

The workshop was a great opportunity for the participants to know more about Artificial Intelligence and its principles and approaches in order to encourage qualified data specialists on creating AI strategies as well as establishing and developing AI projects.

At the end of the workshop, TAG-KS Executive Director, Mr. Zaid Al Majali, announced the launch of new training programs related to AI and programming including a specialized diploma in AI to be conducted at TAG-KS premises in Amman, next October.

It is worth mentioning that TAG-KS mission crystallizes the vision of HE Dr. Talal Abu-Ghazaleh, founder and chairman of TAG.Global, on paying extra attention to creativity and innovation; a belief that led him to the establishment of Talal Abu-Ghazaleh University College for Innovation (TAGUCI) with the aim of empowering graduates to innovate and create knowledge-based inventions and transform them into marketable products.

In the field of Training and Building Capacities 'Abu-Ghazaleh Academy' and Jordan Engineers Association Sign Cooperation Agreement

AMMAN - Talal Abu-Ghazaleh Academy for Capacity Building (TAG-Academy), a member of Talal Abu-Ghazaleh Global (TAG.Global) signed a cooperation agreement to organize and offer joint training programs with Jordan Engineers Association (JEA).

The agreement was signed by TAG.Global Chairman, HE Dr. Talal Abu-Ghazaleh, and JEA President Eng. Ahmad Samara Al Zoubi.

During the signing ceremony, Dr. Abu-Ghazaleh expressed his pride in the Association, since it is considered the largest professional association in the Kingdom, highlighting its significant role in the society; and calling for establishing a special team to benefit from the digital capacities in various engineering fields particularly in the field of Artificial Intelligence (AI), in addition to providing engineering courses for non-engineers to introduce them to various specialized concepts in this domain.

He also called for establishing joint diploma-level programs between TAG-

Academy and JEA in engineering and digitization fields, noting that the Association should address problems related to real estate in Jordan being the authorized body to tackle such issues.

For his part, Eng. Al Zoubi expressed his pride in the cooperation with TAG. Global; in view of the fact that it is the largest company worldwide with a wide range of experience and professional services.

In addition, Eng. Al Zoubi discussed the possibility of providing support to the Engineers' Academy for Development and Training which was recently launched by the Association, as well as other relevant topics of mutual concern.
