Talal Abu-Ghazaleh Tenders (TAG-Tenders) is one of the most promising member-firms of the Talal Abu-Ghazaleh Global (TAG.Global). TAG-Tenders offers a wide variety of expert and professional services in the field of tendering consultation, procurement, procurement training and procurement implementation and execution for optimal economic opportunities.

Our mission is to offer our clients a complete range of high-quality top professional services and contribute to the economic, social and cultural development of our economy in Jordan, the Arab region and worldwide.

We are managing to achieve this mission through interactive and interconnected levels. On the most basic, we seek to provide practical and effective solutions to the problems faced by our valued clients.

We do this through a more holistic basis, conducting internal brainstorming and strategy sessions with our best consultants, first addressing and identifying the issues at hand and then coming up with the solutions that need to be presented to the Arab business community and international clientele.

'Abu-Ghazaleh Knowledge Forum' and the British Council Hold IELTS Introductory Session

AMMAN – Talal Abu-Ghazaleh Knowledge Forum (TAG-KF), a member of Talal Abu-Ghazaleh Global (TAG Global), has held an introductory session on the International English Language Testing System (IELTS) test for a group of participants, in cooperation with the British Council in Amman.

During the session, Council specialists, briefed the participants on the test and its four sections (reading, writing, speaking, and listening), in addition to a range of tips and advices for those who may register for training courses or just sit for the test.

The International English Language Testing System (IELTS) is an international standardized test of English language proficiency for non-English language

speakers. It is trusted by governments, employers, and thousands of universities in the United States of America, in addition to a large number of universities, educational institutions, and government departments in more than 140 countries.

More than 3.5 million people take the test every year for various reasons; mainly to study basic and higher studies, particularly in British and Australian universities and centers, where the exam is accepted globally as a measurement of English proficiency, in addition to those eager to take

non-academic courses or just for immigration purposes.

To this end, TAG-KF and the British Council agreed to continue organizing and holding such introductory sessions in response to the ongoing need of young people for such sessions, especially for high school students and those planning to apply for scholarships or higher education certificates.

For more information about TAG-KF's upcoming sessions, please contact:

Abu-Ghazaleh Takes Part in Sultanate of Oman International Conference on Accounting and Auditing

AMMAN - HE Dr. Talal Abu-Ghazaleh, founder and chairman of Talal Abu-Ghazaleh Global (TAG.Global) and chairman of the International Arab Society of Certified Accountants (IASCA), has participated (digitally) Oman International Conference on Accounting and Auditing; which was also attended by the President of the New York-based International Federation of Accountants (IFAC), President of the UK-based Association of Chartered Certified Accountants (ACCA), President of the Australia-based Certified Practising Accountant (CPA), Chairman of the Oman Association for Chartered Public Accountants (OACPA), and President of Saudi Organization for Chartered and Professional Accountants (SOCPA).

The conference covered several significant topics including the International Public Sector Accounting Standards, contemporary internal auditing techniques and approaches, sustainability, latest updates to some standards, and professional ethics and morality.

In his statement, Dr. Abu-Ghazaleh expressed his pride at being elected as the first non-Western accounting organization member to the IFAC Board of Directors in 1992. He further welcomed the President of ACCA, pointing out that IASCA was established and hosted at the ACCA's headquarters in 1984, extending gratitude for its support. Dr. Abu-Ghazaleh underlined the importance of advancing the accounting profession to keep up with the development in the Knowledge Era, which requires a comprehensive digital transformation in all aspects of our lives;

affirming that developing the accounting and auditing standards and services to become digital has become a necessity.

He further stated that TAG.Global is working on developing the 'Audit Tech' program which is based on the international accounting and auditing standards, noting that it will be installed on the clients' accounting systems to directly generate the audit reports.

Moreover, Dr. Abu-Ghazaleh referred to his efforts while handling various international positions, including his election to the International Accounting Standards Board and the International Financial Data Standards in London, explaining that he advocated for the amendment of auditing objectives not just to encompass the preparation of financial data such as profit and loss statements and balance sheets but to also assist economic decision-makers in making necessary decisions to enhance profits and financial conditions.

It is worth mentioning that the Oman International Conference on Accounting and Auditing discussed the most important challenges facing the accounting and auditing profession in terms of skills, ethics, and competencies.

Dr. Abu-Ghazaleh Launches Scholarships for Specialists in the Reconstruction of 'Gaza'

AMMAN – HE Dr. Talal Abu-Ghazaleh, founder and chairman of Talal Abu-Ghazaleh Global (TAG-Global), has announced the launch of fully-funded scholarships offered from the Talal Abu-Ghazaleh Global Digital University (TAG-GDU), for specialists and experts in Palestine working in the

fields of health, architecture, project management, community development, and reconstruction, particularly with respect to the Gaza reconstruction projects.

These scholarships fall in line with the series of initiatives launched by Dr. Abu-Ghazaleh to empower and sharpen the administrative and technical capacities in support of Gaza.

On this occasion, Dr. Abu-Ghazaleh affirmed that such scholarships cover five foundational diploma programs designated specially for reconstruction purposes, and will provide experts with the opportunity to improve and enhance their skills in vital areas such as urban planning, project design, community development, and public health, among others.

"Experts who will be awarded this scholarship are not just professionals, they are rather the pioneers who seek to build bridges of hope and progress," Dr. Abu-Ghazaleh said.

He also reaffirmed that this initiative comes in the context of the ongoing efforts to support the reconstruction processes in Gaza after the atrocities committed against the Palestinians in the Gaza Strip, pointing out that these scholarships aim at strengthening technical capabilities and providing the necessary support to experts who play a key role in achieving the success and sustainability of reconstruction efforts.

"The reconstruction of Gaza becomes more than just a mission when knowledge and determination come together; it is more accurately an opportunity for real transformation," he stated, adding, "We always aim to create a success story that crosses boundaries, and this scholarship paves the way for achieving this goal through creativity and perseverance."

Dr. Abu-Ghazaleh Patronizes the Launch of Cooperation Agreement with WIPO and Egyptian Patent Office

CAIRO - HE Dr. Talal Abu-Ghazaleh, founder and chairman of Talal Abu-Ghazaleh Global (TAG.Global), has patronized in Cairo the launch of the cooperation agreement between TAG. Global and the World Intellectual Property Organization (WIPO) concerning the 'image converting to text, content review and e-archiving of the Egyptian Patent Office files' project.

The ceremony was attended by Dr. Mona Yahya, president of the Egyptian Patent Office, Dr. Hisham Fayed, head of IPO Support at WIPO for the Middle East and North Africa, and Eng. Suhair Helmy, project manager at the Egyptian Patent Office, and a host of concerned personalities.

During the ceremony, Dr. Abu-

Ghazaleh said: "We are pleased to cooperate with WIPO and unite our forces to contribute to empowering organizations and individuals across the world in a mechanism to protect their intellectual properties and generating new opportunities for growth and development."

He went on to add that: "This partnership is considered an important step in the IP protection field, and it underlines TAG. Global's dedication to driving innovation and technological advancement. TAG. Global and WIPO would effectively share their expertise and resources to archive patents and intellectual assets in the Egyptian Patent Office."

For her part, Dr. Mona Yahya welcomed the attendees and expressed her pride

in the cooperation between 'Abu-Ghazaleh Global', WIPO and the Egyptian Patent Office, which would serve the mission of the Academy in effectively employing technological capacities, developing national innovations to support small and medium industries within the framework of the intellectual property right protection.

Dr. Yahya pointed to the role of the Egyptian Patent Office in protecting IPRs, issuing patents, encouraging creativity and innovation at the country's level, noting that this tri-lateral cooperation serves the effective management of such innovations.

The project aims to convert the content of the Egyptian Patent Office's files into searchable text files, enabling users to quickly access documents and related contents in a safe work environment through a centralized automated system that prevents the loss of exchanged documents, and protects information security, as the Egyptian Patent Office maintains the largest collection of patents in Arabic, estimated at about 30 thousand files.

It is worth mentioning that the project will be carried out by Talal Abu-Ghazaleh for E-Archiving and Automation System Department, a member firm of TAG. Global and one the most prominent entities working in the field of electronic archiving. In fact the Department has previously archived over 250 million documents - in just three years - for major public and private institutions in Jordan and a number of Arab countries. This was achieved using an integrated system of electronically archiving paper documents that was designed to meet the highest international standards provided in several languages.

It should be noted that the World Intellectual Property Organization (WIPO) is a global forum for intellectual property services, policies, cooperation and information, founded in 1967 to establish a balanced and effective international intellectual property system that encourages creativity and innovation for the benefit of all, and is one of the self-funding agencies of the United Nations.
