

My dearest friend Talal,

Age is a mere indicator of one's biological progression.

It is by no means a performance index.

With age comes experience, wisdom, insight, culture,
history ,& achievements.

By your achievements, you must be 1350 years old.

By your friendship, you must be 65 years old
By your vision, you must be 55 years old.

By your ambition, you must be 45 years old
By your tonus, you must be 35 years old
By your passion, you must be 25 years old
By your dreams, you must be 15 years old.

By your smile, you must be 5 years old.

No matter, what shows on you biological clock, you made
our lives special just By being part of it.

May you live to become 105

Happy birthday

HE Yacoub Sarraf

Dear Yacoub, most distinguished leader and friend,

It is indeed an honour and pride for me to deserve to
be your friend. I am overwhelmed.

THANK YOU, Your Excellency. My Eid is when I see you.

Talal Abu-Ghazaleh
