Abu-Ghazaleh inaugurates ASREN's new offices and announces its first Research for Innovation Network Operations Center in Amman

Cooperation Agreement between Talal Abu-Ghazaleh Global and Semanoor Regarding Smart Books, Curricula and TAG.Tech Electronic Devices

The fourth series of TAGTech smartphones 'Abu-Ghazaleh for Technology' Introduces TAG-Phone SPECIAL

Abu-Ghazaleh inaugurates ASREN's new offices and announces its first Research for Innovation Network Operations Center in Amman

AMMAN - Following the successful implementation of its first Point of Presence (PoP) in London, the Arab States Research and Education Network (ASREN) has now implemented its first Network Operations Center (NOC) in ASREN's new offices at Talal Abu-Ghazaleh University College for Innovation (TAGUCI) in Amman.

ASREN now provides its members of National Research and Education Networks (NRENs) with NOC services to monitor and manage international networks and border gateway protocol for inter-domain peering to ASREN and GÉANT PoPs. ASREN team also offers online and offline support to fix problems and resolve technical issues with ticketing system.

The establishment of the Network Operations Center came out as a result of cooperation with the European GÉANT network within the framework of the European Union's co-funded project AfricaConnect3.

ASREN will continue to support its member NRENs and will further work on establishing Cloud Services and a Regional Security Operations Center (SOC).

HE Dr. Talal Abu-Ghazaleh, Chairman of ASREN further said: “We can now provide our NREN communities with advanced services and we plan to provide more services in the very near future, namely Cloud Services. We always thank the European Union for their generous co-funding and GÉANT for their continuous support”.

Cooperation Agreement between Talal Abu-Ghazaleh Global and Semanoor Regarding Smart Books, Curricula and TAG.Tech Electronic Devices

Talal Abu-Ghazaleh Global has signed a cooperation agreement with the Saudi company, Semanoor, to cooperate in the fields of smart books, curricula in digital education and in the supply of electronic devices to better enable education.

The agreement was signed by the Chairman of TAG-Global's Management Board Mr. Salah Abu-Osbeh, and by Mr. Emad Fahd Al Doghaither, CEO of Semanoor.

The cooperation aims to integrate electronic books and smart curricula developed by Semanoor, with digital devices designed and produced by Talal Abu-Ghazaleh Technology (TAG.Tech) a TAG.Global company, in its factories in China, Egypt, and Jordan; as well cooperate in joint marketing worldwide.

Mr. Salah Abu-Osbeh mentioned that TAG.Tech is proud of this cooperation that will be implemented through its network of global offices to reform education through digital transformation by introducing a unique range of educational devices powered by innovative content from Semanoor.

He went onto mention that the agreement serves the vision and objectives of the group's chairman and founder, Dr. Talal Abu-Ghazaleh, in shifting from traditional education to modern learning and contributing to the digital transformation of learning platforms and applications in the education sector across the Arab region and the world.

Mr. Al Doghaither expressed his pride in cooperating with the TAG.Global, especially as the two parties seek to achieve the same goals to develop education, training and electronic publishing on an international level.

He concluded by saying that through this cooperation he wants to contribute to the implementation of modern education strategies globally, by providing a portable electronic device to serve as an integrated smart electronic book that combines on device applications with content from the cloud, including leveraging technologies such as virtual and augmented reality.

Through this, all actors in the educational process would benefit, including governmental and private institutions, schools, universities, training centers, teachers, students, researchers, publishers and authors in the fields of education and training in all languages of the world.

The fourth series of TAGTech smartphones 'Abu-Ghazaleh for Technology' Introduces TAG-Phone SPECIAL

AMMAN – Talal Abu-Ghazaleh for Technology (TAGTech), a member of Talal Abu-Ghazaleh Global (TAG Global); specialized in information and communication technology field, announced the launch of the fourth series of its smartphones for the year 2021 (TAG-Phone SPECIAL) designed and manufactured with higher specifications at affordable and competitive prices.

The newly-manufactured TAG-Phone SPECIAL was designed at TAGTech factories in China with improved international specifications, updating the previous versions, by specialized experts in the field of manufacturing and development.

TAG-Phone SPECIAL, that is characterized by its high specifications and potentials will be available at competitive prices in order to provide a distinctive use experience. It comes with 6GB RAM, 128GB storage capacity that can be expanded and a MediaTek P60 Octa core processor for a faster performance, in addition to a 6.52-inch HD screen with 16MP Front Camera and 20MP Rear Camera. TAG-Phone SPECIAL also comes with Dual Nano SIM card and fast Charging Port, with the operating system Android 11. The device comes in brown color.

It is worth mentioning that TAGTech has always been keen, since its establishment in 2018, on offering its clients the latest and most advanced technologies with high-specs and competitive prices, with the Company's aim to provide its clientele with a comprehensive experience comparable to that offered by other brands.

TAG-Phone SPECIAL device is available in Jordan at JD160; tax included with one
