Registration and Renewal of .KW for One Year in Kuwait

KUWAIT - The Communication and Information Technology Regulatory Authority of Kuwait (CITRA) announced that it started renewal and registration of (.KW) domains for a period of one year in Kuwait, instead of two years.

Talal Abu-Ghazaleh Domain Names (TAG-Domains), an ICANN accredited registrar, provides domain name registration and renewal services in Kuwait, including (gTLDs), Country Code Top- Level Domain Names (ccTLDs) and Internationalized Domain Names (IDNs).

In this regard, TAG-Domains advises its clients that it will provide (.KW) domain name registration and renewal services for \$130 a year.

For more information or inquiries, please contact us at kuwait@agip.com or info@tag-domains.com

Registration and Renewal of .KW for One Year in Kuwait

TAG-Domains Offers Domain Name Registration in Cyprus under (.com.cy) and (.tm.cy) for 5-10 Years

Recommendations for the Technical Utilization of the Root Zone Label Gener

TAG.Global Holds DNS and Cybersecurity Workshop

NICOSIA - TAG-Domains, a subsidiary of Abu-Ghazaleh Intellectual Property (AGIP) and an ICANN Accredited Registrar, would like to draw the attention of its clients that it currently offers domain names registration in Cyprus under (.com.cy) and (.tm.cy) for 5-10 years.

Meanwhile, requirements for domain names registrations remain unchanged:

- One Request letter on the domain name applicant's letterhead that must be signed and stamped with the company seal of the domain name applicant.
- One application form (the client specifies if he/she wishes to register the domain for 5 or 10 calendar years).

For information regarding TAG-Domains professional fees for domain names registration, please check the our website (tagidomains.com) or contact us at cyprus@agip.com

Recommendations for the Technical Utilization of the Root Zone Label Gener

LOS ANGELES - The Internet Corporation for Assigned Names and Numbers (ICANN) announced the release of the Recommendations for the Technical Utilization of the Root Zone Label Generation Rules (RZ-LGR) by the Root Zone Label Generation Rules Study Group (RZ-LGR SG). These recommendations are being provided to the ICANN Board for further consideration.

With the availability of the Root Zone Label Generation Rules and its fundamental role envisaged for defining the variant labels of top-level domains (TLDs), the ICANN Board asked the ICANN community (including Supporting Organizations, Advisory Committees, and the Internet Architecture Board) to study and recommend how to technically apply the RZ-LGR in a harmonized way to generic and country code top top-level domains (gTLDs/ccTLDs).

To address the request from the ICANN Board, the RZ-LGR SG was formed from the nominees of SOs, ACs, IAB, and additional volunteers from the ICANN community following the Call for formation in February 2018. The SG first determined the scope of its work, and enriched it with feedback received from the community through the first public comment call in August 2018. Based on this scope, the SG has developed a set of recommendations, which was released for public comment in May 2019. The RZ-LGR SG has now completed and published its the Recommendations for the Technical Utilization of the Root Zone Label Generation Rules, after incorporating the community feedback.
